## PMI-ACP® Webinar / Semiar

PMI-ACP® (Agile Certified Practitioner), 21 PDU

## Agility of its Best

More and more companies expect an agile project management certification from their software project managers. This prove the fact that a high potential of the software projects follow an agile process model.

Since the 2nd half of 2011 the Project Management Institute (PMI®) has established the PMI Agile Certified Practioner (PMI-ACP)® exam.

The traditional project management methods answer the question of "what", the agile project management methods answer the question of "how".

We offer the PMI-ACP® exam preparation provided by a Webinar/Seminar solution, 30 * 1 hour duration, 3 times a week, Video cut from each Webinar, access to our 800+ Question Catalogue & Exam Simulation Online and as eBook (approx. 2500 questions), a Management Excel and a JIRA Agile Installation with samples.

### PMI® and the PMI-ACP®

The Project Management Institute (PMI®) follows industry best practice standards for the PMI-ACP® exam. Compared to the PMBOK® there is no similar, authoritative guide for the agile frameworks or body of knowledge.
For the PMI-ACP® exam PMI® announced a list of 11 books, written by various experts from the agile sphere as the basis. That body of work covers little less than 5000 pages.
Mastering all that content is daunting enough. But because those 11 authors have differing and sometimes opposing opinions about agile software development it makes it hardly more challenging to prepare for the exam.

We have analyzed, integrated and aligned the 11 books to create a comprehensive, usable, and accessible exam preparation webinar. We have also identified where the 11 books have opposing, conflicting, or varying in views, interpretations or recommendations. The result is a comprehensive preparation for the PMI-ACP® exam.

### Motivations

The PMI-ACP® certification is important, because it provides the most broad agile certification. In addition to our Webinar/Seminar we recommend also the Book "PMI-ACP\ :sup:`SM` Exam Prep" written by Mike Griffiths (ISBN 978-1-932735-58-1 or better).

The exam has a high-level scope. We recommend to pass the exam close to the webinar end. We keep our 800+ Questions Catalogue (approx. 2500 questions) and class forum open for students 12 months in general and after the Webinar/Seminar booking. The student must be online in classes in the Webinar / Seminar at least a minimum of 21 hours to earn 21 PDUs, handed out by SANTIS Training AG (R.E.P. 2851).

## Organization

The webinar / seminar is organized in 16 theme lessons, covering 30 h of Webinar sessions or 10*3 h evening Seminar, including ¼ h / hour of exam question study.

Every student can takeover the control in the question study and also the regular webinar. This is why we recommend any webinar student to check camera and micophone.

The 1st lesson is the introducing lesson and is free of charge. Classrooms are 10 to 40 students with the possibility to be max. 50. We recommend you to work together in groups. Because of this, we share the students eMail contact to the class.

### Why you should prepare to the exam with us ?

Only we provide webinars, seminars, flexibility to combine, 800+ question online / eBook media (2500 questions) and reusable management tools (XLS), JIRA Agile on one hand.
**SANTIS Training AG** is a well known R.E.P. and Training provider in the area of project management.

**Ritz Engineering GmbH** is a well known consultant of agile projects and agile requirements engineering in a broad range of business areas. Frank H. Ritz (PMI-ACP Number: 1608079) is your trainer.

The price of the webinar is CHF 1000.00 and the evening seminar at Santis, Altstetten is CHF 2100.00. For both we also provide webinar open class add-ons until you successfully pass the exam. Included are the question catalogue. Visit us for all prices and combinations, to register online or to pay online:
